★★★★★
"A Bitcoin lending platform where you do not give up custody of your BTC. What a unique concept."
— Antonio, Canada

★★★★★
"I needed cash without selling my BTC position. Cadena made it happen in minutes. This is the future of Bitcoin finance."
— Frederick, Denmark

How It Works

Two ways to use Cadena — both fully non-custodial.

I want to borrow | I want to lend

01 — Lock BTC in a DLC
Your Bitcoin is locked in a Discreet Log Contract on-chain. You keep your private keys throughout — Cadena never touches your coins.

02 — Receive loan funds
Get matched with a lender and receive Bitcoin directly. The whole process takes minutes, not days. No paperwork, no credit check.

03 — Settle at term end
After 365 days, the DLC settles automatically. Repay the loan and your BTC is unlocked. No margin calls, ever.

Get Your Loan

Why Cadena?

Most Bitcoin lenders take your coins. We don't.

True Self-Custody
Your private keys never leave your hands. Bitcoin is locked in on-chain DLC contracts — Cadena has zero access.

No Margin Calls
Unlike custodial lenders, Cadena uses fixed-outcome DLCs. No liquidation bots. No forced selling. No sleepless nights.

Minutes, Not Days
Loan matching and on-chain funding happens in minutes. No lengthy approval process, no banking hours, no borders.

Fully On-Chain
Every loan is enforced by Bitcoin script — no trusted third parties, no off-chain databases, no counterparty risk.

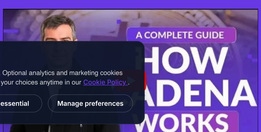

How We Compare

See why Cadena is the only way to borrow Bitcoin without the trade-offs.

FEATURE	Cadena	Custodial Lenders	Selling BTC
Keep BTC in self-custody	✓	✗	✗
No margin calls	✓	✗	N/A
No credit check	✓	✓	N/A
No taxable event	✓	✓	✗
Fully on-chain enforcement	✓	✗	N/A
Keep BTC price upside	✓	✗	✗
Lender gets guaranteed return	✓	✗	N/A

Frequently Asked Questions

Every question you have before taking the first step.

What happens if Bitcoin's price drops?

Nothing bad. Cadena uses fixed-outcome DLC contracts, not liquidation-based models. If Bitcoin's price falls, the DLC settles at the prevailing price at expiry — there are no margin calls and you are never force-sold. Your worst case is receiving back your collateral denominated at the lower BTC price at term end.
